Kansas Airport System Plan
District 6 - Aviation Project Descriptions

Prepared: August 25, 2008

The 2008 Local Consultation meetings are intended to develop and refine the regional and statewide transportation needs and priorities in Kansas. Specific projects will not be selected for funding through the local consultation or the T-LINK task force process.

The aviation projects outlined within are a few of the needs that KDOT is aware of and should serve as a starting point for discussion. Specifically, this project list was compiled through a combination of KDOT's system planning efforts, Federal National Plan of Integrated Airports System planning process and in consultation with local communities. This list is intended merely as a beginning point for discussion purposes, and it is expected that many other needs will arise as a part of the Local Consult process.
